# Wheat Germ Powder

Our Wheat Germ Powder comes from the wheat germ that is found on the tip of the grain. This tiny part of the ripe wheat grain is naturally rich in vitamins, minerals, micronutrients, and amino acids. In addition to protein, the germ also contains unsaturated fatty acids. In a complex process, the germ is separated from the grain and processed into a powder.

We offer both a conventional version and an organic version.

Wheat Germ Powder is a superfood and ideal in:

- Muesli
- Smoothies
